Contract Period: Nov 2022 – Aug 2028
Contract Ceiling: \$25 billion

Revolve Solutions LLC was established by a retired Marine who remains as committed to veterans today as he did when he wore the uniform. As a Service-Disabled Veteran-Owned Small Business since 2006, we have established ourselves as a strategic, small business partner that provides value to every customer.

Revolve received the on-ramping award to **VA VECTOR** in November 2022. We operate with a combination of prime contracts and subcontracts inside the Federal government.

Revolve's Functional Expertise related to this Sources Sought Notice

- Data analytics and data science
- Digital Photography and **Video Production**
- Enterprise Architecture
- Program and project management
- Requirements identification and validation
- Strategic communications
- Training development and delivery

Strategy & Project Management

Description: Revolve possesses a lengthy history of building strategies and delivering measurable results to the customer. **Veterans Affairs**, Army, Marine Corps, and Labor are customers who benefitted from our team's management of programs/projects, often at the senior levels of executive and political leadership. Managing communities of interest and centers of excellence are common practices, and our veteran staff find the dots to make meaningful connections.

Data Collection and Data Analysis

Description: Revolve performed work that applied data analytics and data science to numerous government programs. Support included data processing, hosting, and related services. We supported the data management for the Army's Business Enterprise Architecture and its Enterprise Data Services Catalog. Our project team has extensive experience with conducting interviews, cataloging the results, and presenting options to the customer. Our deeper data science work also required our team to support a military agency with researching alternative solutions to meet gaps in business processes. Our communications team publicized the effort to recruit members of the agency and then share the results across the organization in a first-of-its-kind manner using social media and internal communications channels.

Communication & Stakeholder Engagement

Description: Revolve supports several enterprise-wide strategic communications programs that require constant and direct interaction with senior leadership. The development of an Engagement Playbook is a regular deliverable, and stakeholder engagements through interviews and surveys are summarized into action plans for executive consumption and decision-making. Our project teams span internal and external audiences for every customer. One current engagement requires our team to survey Transitioning Service Members (TSM) and their experience using the in-person and online resources to manage their transition to civilian life. Spouses and veterans are included in the assessments. The feedback and analysis assist our project training team to implement adaptive and assistive resources to better meet their needs.
